

## Interim Performance Objectives

Final Report Fiscal Year 1999

Student Financial Assistance

SA

A MESSAGE FROM THE CHIEF OPERATING OFFICER

#### **Dear Customers and Partners:**

I am proud to send you SFA's final report on the Interim Performance Plan. We have met, and even surpassed, nearly all our goals. Take a look at the Status at a Glance chart on the first page. We have new products such as Direct Loan entrance and exit counseling, a website that allows students to correct their aid applications online, and a subsidiary ledger system design. We are doing our core business better too — processing aid applications faster, consolidating loans faster, awarding Pell grants faster, and helping more borrowers to avoid defaulting on their loans. We've also met all the major milestones on our way to becoming a Performance Based Organization — we found out from our customers what they want, realigned our organization and business processes so we can deliver what they want, completed a Computer Systems Modernization Blueprint, and hired a modernization partner to help us use computers like the best in business use them to cut costs and satisfy customers.

The interim goals were essentially met. The preparation is complete. Now SFA is ready to show what a PBO can do. In our Five-Year Performance Plan we will narrow our focus to three measures of success and set our sights high. We'll raise our **customer satisfaction** index from a level typical of government to the range enjoyed by America's best financial service companies. We will reduce our **unit cost** — the amount we spend administering per recipient — by one-fifth. And our **employee satisfaction rating** will soar from mediocre to the level of NASA workers who reach for the stars. Why shouldn't SFA employees find their jobs just as satisfying? After all, they help put America through school.

Look for our Five-Year Performance Plan. It will be out next month and we'll report progress quarterly.

And Wares

### **OBJECTIVE ONE: Improve Customer Service**

- SFA completed its Y2K renovation and testing in early March, and now we are working to ensure that our partners are also ready for the new millennium. We are exchanging test data with schools and financial partners and posting the "Testing Honor Roll" on the Department's Y2K web page (http://www.ed.gov/offices/OCIO/year/b2c1.html).
- Our goal was to provide customers with five new positive experiences in service delivery. We came up with nine. New, better services since the last quarterly report include: FAFSA Corrections on the Web, web-based Direct Loan Exit Counseling, and the establishment of "business partnerships" with Guaranty Agencies to share best practices related to debt collection efforts.
- We met our goal to introduce five new electronic products and services. One such product is "SFA COACH," a basic training course for school aid administrators. Its development was accelerated in response to the expressed needs of our partners. Available on the web, the course contains 21 lessons with a total of 36 coming on line by January 2000. A preview version available on CD was recently mailed to schools.
- We met the spirit of one goal, but not the letter. We set out to complete all critical transactions affecting schools so that we would not disrupt service to the students. We did manage to avoid disrupting service to students, but only by devising workarounds for late transactions. We'll keep this goal on the books and keep working on it.
- \* We dropped one goal that we thought was a great idea, but schools didn't. We wanted at least half of the Direct Loan schools to disburse money to students while they wait. Through surveys we learned that only about one-third of schools wanted to use this flexibility. Some schools, for example, have a policy not to disburse funds before the Department accepts the promissory note. We'll continue to make the option available to all Direct Loan schools.

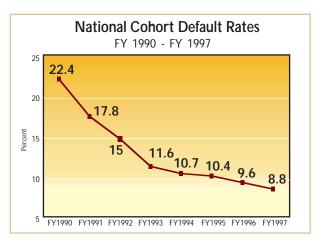

SFA met its goal of receiving 3 million electronic FAFSAs in 1999

# OBJECTIVE TWO: Reduce the Overall Cost of Delivering Student Aid

- \* This quarter, we established baseline estimates of the overall unit cost of delivering student aid. The next step is to disaggregate the total unit cost into a unit cost for each of our major business processes. That will give us a new management grip on things, and focus everyone's energies on a critical measure of success — cutting unit costs by one-fifth.
- Default costs dwarf all others, so we work especially hard helping borrowers avoid defaulting on their loans. On October 5, the Department announced the national student loan default rate fell to 8.8 percent for fiscal year 1997, the lowest point since the federal government started tracking and managing the rate. It is the seventh consecutive year of decline.
- We completed the conceptual design of a financial management system that will include cost accounting and full subsidiary ledger structures to support SFA requirements and provide important management information.

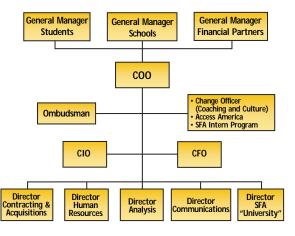

# OBJECTIVE THREE: Transform the Student Financial Assistance Office Into a Performance-Based Organization

- During the last quarter, we released the Computer System Modernization Blueprint. This version of the blueprint follows extensive dialogue with the student aid community on several earlier drafts. The blueprint maps SFA plans to modernize and integrate its systems based on the best private sector practices.
- We have created an SFA Ombudsman organization equipped with a complaint tracking system, hotline, and website. Our Ombudsman is helping customers resolve the most intractable problems and is collecting information that we will use to improve our services and prevent future problems.
- Our Five-Year Performance Plan is on the Web at www.ed.gov/offices/OSFAP for public review and comment. We will deliver it to Congress in November.

• We have reorganized our workforce and our business processes to align with our customer segments. We have three general managers — for Students, Schools, and Financial Partners — a CIO, and a CFO. We have filled all the top jobs with top-notch people, several of them experts in their field from the private and public sectors.

#### The New SFA
